Updated Other Contaminant

Notes:

Spoke with the production supervisor for Continental while on site for the Della CTB inspection on 2/4/14. The production supervisor informed me that there had been a glitch when he tried to enter this site's information into our incident data base, which led to the information not being entered within the 24-hour timeframe. He informed me that he had spoken to the landowner and they were fine with the cleanup and would like to take a look at it in the spring. Follow up with inspection when in the area.

Date: 10/7/2014 **Status:** Inspection

Author: Stockdill, Scott

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location on 10/7/2014.

No sign of spill in the described location. However, there is a small burn mark next to the CTB location just to the east of the flare pit.

No followup is necessary.
